Section 2. Hazard	Is identification
HSNO Classification	: FLAMMABLE LIQUIDS - Category 3 EYE IRRITATION - Category 2 CARCINOGENICITY - Category 2 REPRODUCTIVE TOXICITY - Category 2 SPECIFIC TARGET ORGAN TOXICITY - SINGLE EXPOSURE - Category 2 SPECIFIC TARGET ORGAN TOXICITY - REPEATED EXPOSURE - Category 2 LONG-TERM (CHRONIC) AQUATIC HAZARD - Category 2
This material is classified as Notice 2020.	hazardous according to criteria in the Hazardous Substances (Hazard Classification)
This material is classified as Transport of Dangerous Goo	DANGEROUS GOODS according to criteria in New Zealand Standard 5433:2012 ds on Land.
GHS label elements	
Signal word	: Warning

Signal word	: warning
Hazard statements	: Flammable liquid and vapour.
	Causes serious eye irritation.
	Suspected of causing cancer.
	Suspected of damaging fertility or the unborn child.
	May cause damage to organs.
	May cause damage to organs through prolonged or repeated exposure.
	Toxic to aquatic life with long lasting effects.
Dressutionen, statemente	

Precautionary statements

Section 2. Hazards identification

Prevention	:	Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Wear protective gloves, protective clothing, eye protection, face protection, or hearing protection. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Avoid release to the environment. Do not breathe vapour or spray. Do not eat, drink or smoke when using this product. Wash thoroughly after handling.
Response	:	Collect spillage. IF exposed or concerned: Call a POISON CENTER or doctor. IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice or attention.
Storage	:	Store locked up.
Disposal	:	Dispose of contents and container in accordance with all local, regional, national and international regulations.
Symbol	:	
Other hazards which do not	:	None known.

result in classification

Section 3. Composition/information on ingredients

% (w/w)	CAS number
10.444	123-86-4
7.0928	7779-90-0
6.8428	1330-20-7
6.0801	64742-95-6
1.6604	100-41-4
0.28371	1314-13-2
0.16888	10043-01-3
	10.444 7.0928 6.8428 6.0801 1.6604 0.28371

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

Section 4. First aid measures

Description of	inecessary firs	t aid	measures

Inhalation	: Remove victim to fresh air and keep at rest in a position comfortable for breathing. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention. If necessary, call a poison center or physician. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.
Ingestion	: Wash out mouth with water. Remove dentures if any. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention. If necessary, call a poison center or physician. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

Section 4. First aid measures

Skin contact : Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Continue to rinse for at least 10 minutes. Get medical attention. If necessary, call a poison center or physician. Wash clothing before reuse. Eye contact : Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention. If necessary, call a poison center or physician. Most important symptoms/effects. Get medical attention. If necessary, call a poison center or physician. Most important symptoms/effects. Get medical attention. If necessary, call a poison center or physician. Inhalation : May cause damage to organs following a single exposure if inhaled. Ingestion : May cause damage to organs following a single exposure if swallowed. Skin contact : Causes serious eye irritation. Over-exposure signs/symptoms Inhalation Inhalation : Adverse symptoms may include the following: reduced foetal weight increase in foetal deaths skeletal malformations Ingestion : Adverse symptoms may include the following: reduced foetal weight increase in foetal deaths skeletal malformations Skin : Adverse symptoms may include the following: reduced foetal weight increase in foetal deaths skeletal malformations Skin : Adverse symptoms may include the following: pain or irinitation watering reduced foetal weight increase in foet		
eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention. If necessary, call a poison center or physician. 	See toxicological information	(Section 11)

Section 5. Firefighting measures

Extinguishing media	
Suitable	: Use dry chemical, CO ₂ , water spray (fog) or foam.
Not suitable	: Do not use water jet.
Specific hazards arising from the chemical	: Flammable liquid and vapour. Runoff to sewer may create fire or explosion hazard. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. The vapour/gas is heavier than air and will spread along the ground. Vapours may accumulate in low or confined areas or travel a considerable distance to a source of ignition and flash back. This material is toxic to aquatic life with long lasting effects. Fire water contaminated with this material must be contained and prevented from being discharged to any waterway, sewer or drain.
Hazardous thermal decomposition products	: Decomposition products may include the following materials: carbon dioxide carbon monoxide sulfur oxides phosphorus oxides metal oxide/oxides

Section 5. Firefighting measures

Hazchem code	:	3Y
Special precautions for fire- fighters	:	Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.
Special protective equipment for fire-fighters	:	Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

Section 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures	:	If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".
Environmental precautions	:	Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to the environment if released in large quantities. Collect spillage.
Methods and material for co	onta	inment and cleaning up
Small spill	:	Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.
Large spill	:	Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spill product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

Section 7. Handling and storage

Precautions for safe handling		Put on appropriate personal protective equipment (see Section 8). Avoid exposure - obtain special instructions before use. Avoid exposure during pregnancy. Do not handle until all safety precautions have been read and understood. Do not get in eyes or on skin or clothing. Do not breathe vapour or mist. Do not ingest. Avoid release to the environment. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. Empty containers retain product residue and can be hazardous. Do not reuse container.
Conditions for safe storage, including any incompatibilities	:	Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Eliminate all ignition sources. Separate from oxidising materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

Section 8. Exposure controls/personal protection

Control parameters

Occupational exposure limits

Ingredient name	Exposure limits
n-butyl acetate	NZ HSWA 2015 (New Zealand, 11/2018) WES-TWA: 150 ppm 8 hours. WES-TWA: 713 mg/m ³ 8 hours. WES-STEL: 950 mg/m ³ 15 minutes. WES-STEL: 200 ppm 15 minutes.
xylene	NZ HSWA 2015 (New Zealand, 11/2018) Notes: See Notice of Intended Changes WES-TWA: 217 mg/m³, 0 times per shift 8 hours.
	WES-TWA: 50 ppm, 0 times per shift, 8 hours.
ethylbenzene	NZ HSWA 2015 (New Zealand, 11/2018) WES-STEL: 543 mg/m ³ 15 minutes. WES-STEL: 125 ppm 15 minutes. WES-TWA: 434 mg/m ³ 8 hours. WES-TWA: 100 ppm 8 hours.
zinc oxide	NZ HSWA 2015 (New Zealand, 11/2018) WES-STEL: 10 mg/m ³ 15 minutes. Form Fume WES-TWA: 3 mg/m ³ , (Respirable fractio 8 hours. Form: Respirable fume WES-TWA: 10 mg/m ³ 8 hours. Form: Th value for respirable dust.
aluminium sulphate	NZ HSWA 2015 (New Zealand, 11/2018) WES-TWA: 5 mg/m³, (as Al) 8 hours.
Appropriate engineering controls	Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering cont also need to keep gas, vapour or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.
Environmental exposure controls	Emissions from ventilation or work process equipment should be checked to ens they comply with the requirements of environmental protection legislation. In sor cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.
dividual protection measu	
Hygiene measures	Wash hands, forearms and face thoroughly after handling chemical products, be eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated cloth Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.
Respiratory protection	Based on the hazard and potential for exposure, select a respirator that meets th appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other importa aspects of use. Recommended: EN 405:2001 + A1:2009 organic vapour (Type / and particulate filter FFA2P3 R D
Hand protection	Chemical-resistant, impervious gloves complying with an approved standard sho be worn at all times when handling chemical products if a risk assessment indica this is necessary. Considering the parameters specified by the glove manufactur check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated. > 8 hours (breakthrough time): Recommended EN 374 polyvinyl alco (PVA) >= 0.7 mm < 1 hour (breakthrough time): Conditionally suitable materials for protective glove

Section 8. Exposure controls/personal protection

-	· · ·
	EN 374: Nitrile rubber - NBR (>= 0.35 mm). Only suitable as splash protection. Only suitable for brief exposure. In the event of contamination, change protective gloves immediately.
Eye protection	: Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles. Recommended: chemical splash goggles and/or face shield.
Skin protection	 Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Section 9. Physical and chemical properties

<u>Appearance</u>	
Physical state	: Liquid.
Colour	: Grey.
Odour	: Not available.
Odour threshold	: Not available.
рН	: Not applicable.
Melting point	: Not available.
Boiling point	: >100°C (>212°F)
Flash point	: Closed cup: 28°C (82.4°F)
Evaporation rate	: Not available.
Flammability (solid, gas)	: Not available.
Lower and upper explosive (flammable) limits	: Lower: 0.8% Upper: 7%
Vapour pressure	: Not available.
Vapour density	: 4 [Air = 1]
Relative density	: 1.62
Solubility	: Insoluble in the following materials: cold water and hot water.
Solubility in water	: Not available.
Partition coefficient: n- octanol/water	: Not applicable.
Auto-ignition temperature	: Not available.
Decomposition temperature	: Not available.
Viscosity	: Not available.
Flow time (ISO 2431)	: Not available.
Aerosol product	
Type of aerosol	: Not applicable.
Heat of combustion	: Not available.
Ignition distance	: Not applicable.
Enclosed space ignition - Time equivalent	: Not applicable.
Enclosed space ignition - Deflagration density	: Not applicable.
Flame height	: Not applicable.
Flame duration	: Not applicable.

Page: 7/12

Section 10. Stability and reactivity

Chemical stability	The product is stable.	
Possibility of hazardous reactions	Under normal conditions of storage and use, hazardous reactions will not occ	sur.
Conditions to avoid	Avoid all possible sources of ignition (spark or flame). Do not pressurise, cut braze, solder, drill, grind or expose containers to heat or sources of ignition. I allow vapour to accumulate in low or confined areas.	
Incompatible materials	Reactive or incompatible with the following materials: oxidising materials	
Hazardous decomposition products	Under normal conditions of storage and use, hazardous decomposition produshould not be produced.	ıcts

Section 11. Toxicological information

Information on likely r	<u>outes of exposure</u>
Inhalation	: May cause damage to organs following a single exposure if inhaled.
Ingestion	: May cause damage to organs following a single exposure if swallowed.
Skin contact	: May cause damage to organs following a single exposure in contact with skin.
Eye contact	: Causes serious eye irritation.
Symptoms related to t	he physical, chemical and toxicological characteristics
Inhalation	: Adverse symptoms may include the following: reduced foetal weight increase in foetal deaths skeletal malformations
Ingestion	: Adverse symptoms may include the following: reduced foetal weight increase in foetal deaths skeletal malformations
Skin contact	: Adverse symptoms may include the following: reduced foetal weight increase in foetal deaths skeletal malformations
Eye contact	: Adverse symptoms may include the following: pain or irritation watering redness

Delayed and immediate effects as well as chronic effects from short and long-term exposure

Reproductive toxicity					
Not available.					
Specific target organ toxic	<u>ity</u> :				
Name			Category	Route of exposure	Target organs
xylene			Category 2	oral, inhalation	-

 ethylbenzene
 Category 2
 inhalation

 Aspiration hazard

Section 11. Toxicological information

Name

Solvent naphtha (petroleum), light arom. ethylbenzene

Numerical measures of toxicity

Acute toxicity estimates

Route	ATE value	
Oral	7307 mg/kg	
Dermal	16075.4 mg/kg	
Inhalation (gases)	92798.89 ppm	
Inhalation (vapours)	662.48 mg/l	
Inhalation (dusts and mists)	14.36 mg/l	

Section 12. Ecological information

Ecotoxicity

: This material is toxic to aquatic life with long lasting effects.

Aquatic and terrestrial toxicity

Product/ingredient name	Result	Species	Exposure
n-butyl acetate	Acute EC50 397 mg/l	Algae - Selenastrum	72 hours
	5	capricornutum	
	Acute EC50 44 mg/l	Daphnia - Daphnia magna	48 hours
	Acute LC50 32 mg/l	Crustaceans - Artemia salina	48 hours
	Acute LC50 18 mg/l	Fish - Pimephales promelas	96 hours
	Acute NOEC 200 mg/l	Algae	72 hours
rizinc bis(orthophosphate)	Acute EC50 63.1 mg/l	Daphnia - Daphnia magna	48 hours
	Acute LC50 6.3 mg/l	Fish - Oncorhynchus mykiss	96 hours
kylene	Acute EC50 1 to 10 mg/l	Algae	72 hours
,	Acute EC50 1 to 10 mg/l	Daphnia - Daphnia magna	48 hours
	Acute LC50 1 to 10 mg/l	Fish	96 hours
Solvent naphtha (petroleum),	Acute EC50 2.9 mg/l	Algae - Pseudokirchneriella	72 hours
ight arom.	5	subcapitata	
0	Acute EC50 3.2 mg/l	Daphnia - Daphnia magna	48 hours
	Acute LC50 9.2 mg/l	Fish - Oncorhynchus mykiss	96 hours
	Acute NOEC >1 mg/l	Algae - Pseudokirchneriella	72 hours
	Ũ	subcapitata	
ethylbenzene	Acute LC50 >10 mg/l	Fish - Pimephales promelas	96 hours
zinc oxide	Acute EC50 0.17 mg/l	Algae - Selenastrum	72 hours
		capricornutum	
	Acute LC50 320 ppm	Fish - Lepomis macrochirus	96 hours
	Chronic NOEC 0.017 mg/l	Algae - Pseudokirchneriella	72 hours
		subcapitata	
aluminium sulphate	Acute EC50 6570 µg/l Fresh water	Crustaceans - Asellus aquaticus	48 hours
·	10	- Adult	
	Acute IC50 167 µg/l Fresh water	Algae - Chlorella sp	72 hours
	10	Exponential growth phase	
	Acute IC50 3200 µg/l Fresh water	Daphnia - Daphnia magna	48 hours
	Acute LC50 4.4 mg/l Fresh water	Fish - Pimephales promelas	96 hours
	Chronic NOEC 4 µg/l Fresh water	Fish - Salvelinus fontinalis -	30 days
		Eyed stage, eyed embryo	,

Persistence/degradability

Product/ingredient name	Test	Result	Dose	Inoculum
n-butyl acetate	OECD 301D Ready Biodegradability - Closed Bottle Test	>80 % - 5 days	-	-
Solvent naphtha (petroleum), light arom.	-	78 % - Readily - 28 days	-	Fresh water

Page: 10/12

Section 12. Ecological information

Product/ingredient name	Aquatic half-life	Photolysis	Biodegradability
n-butyl acetate Solvent naphtha (petroleum), light arom.	-		Readily Readily

Bioaccumulative potential

Product/ingredient name	LogPow	BCF	Potential	
n-butyl acetate	2.3	-	low	
trizinc bis(orthophosphate)	-	60960	high	
xylene	3.12	8.1 to 25.9	low	
Solvent naphtha (petroleum),	-	10 to 2500	high	
light arom.				
ethylbenzene	3.6	-	low	
zinc oxide	-	28960	high	
aluminium sulphate	-	362	low	

Mobility in soil

Soil/water partition coefficient (Koc)

: Not available.

Other adverse effects : No known significant effects or critical hazards.

Section 13. Disposal considerations

Disposal methods

: The generation of waste should be avoided or minimised wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and nonrecyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapour from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.
