

TRUEPREP GREEN KILL

OCT 22

DESCRIPTION: TRUEPREP GREEN KILL – A quaternary amine functional biocide for killing infestations of most common strains of moss and lichen. For convenience this material is supplied in a concentrated form and diluted with water at time of use. Usage rates are presented as an initial guide only and do not account for wastage or substrate or build variations.

APPLICATION:

- Add 1 part Biocide to 20 parts water for light growth moss and lichen infestation.
- Add 1 part Biocide to 10 parts water for medium growth moss and lichen infestation.
- Add 1 part Biocide to 5 parts water for heavy growth moss and lichen infestation.
- Do not add soaps or ancillary additives/wetting agents.
- Apply by flood coating to the surface and allow a minimum of 48 hours and preferably a week for sterilization before scrub or waterblast removal of the detritus.

ENVIRONMENT: Exterior

SAFETY PRECAUTIONS

- For a material of this functionality Biocide is relatively low toxicity and fully biodegradable.
- The concentrated material however can cause severe eye damage and may burn sensitive skin. Should be handled with respect.
- Wear protective gloves and goggles when handling, treat any accidental eye or skin splashes with running water for at least 25 minutes and if necessary, seek medical advice.

TYPICAL PROPERTIES:

Specific Gravity: 1.02

Packaging: 20 Litre resealable plastic pails.

Shipping Weight: 21 Kgs.

Shelf Life (unopened pails): Minimum 12 months.

Viscosity: Low

Active concentration: 30%

Practical Spread Rate: 8 -12 m2 per litre of mixed material.

Pack Size: 5 Litre

Safety: Non-flammable. Wet material is alkaline – avoid eye & skin contact.

PRODUCT CODE:

TRUEPREP GREEN KILL 99-507.05
