Swallowed Acute oral LD50 (rat) > expected to be > 2000mg/kg. Aspiration into

the lungs may cause chemical pneumonitis which can be fatal

Eyes Moderately irritating

Skin Acute dermal LD50 (rat) expected to be > 2000 mg/kg. Expected to

be a slight irritant. Prolonged or repeated contact may cause

defatting of the skin which can lead to dermatitis

### Section 4. First Aid Measures

Routes of Exposure:

Eye Flush with cold water for at least 15 minutes. Seek medical

Skin If skin contact causes irritation remove contaminated clothing and

wash thoroughly with soap and water

Ingestion Do not induce vomiting. Give nothing by mouth. If patient

continues to be distressed seek medical attention immediately. Aspiration into the lungs could cause chemical pneumonitis which

can be fatal.

Inhalation Remove to fresh air. If breathing is difficult seek medical attention

immediately

# Section 5. Fire Fighting Measures

Suitable Foam, Carbon Dioxide, Dry Chemical, Water Spray. Product

Extinguishing media will float on water and spread the fire.

Fire and Explosion Flammable liquid. Vapour accumulation could flash and/or

hazards explode if ignited.

Fire Fighting Fire fighters must use recommended protective equipment and

Instructions self-contained breathing apparatus. Cool storage drums with

water spray

### Section 6. Accidental Release Measures

Land Spill or Leaks Remove containers to a detached area. Bund spill with inert

material e.g. sand, transfer remaining product from damaged container to new container. Remove all sources of ignition and people from the area.

For large spills, evacuate the area of all non-essential personnel. Shut off leaks, if possible without personal risk.

# Section 7. Handling and Storage

Handling Advice: Avoid contact with skin and eyes. Do not breathe vapour.

Extinguish naked flames. Remove ignition sources. No smoking.

Storing Procedures: Store in a cool area away from all ignition sources. Do not store

alongside food or feedstuffs. Check regularly for leaks.
